Skin:

Denies Hives. Denies Itching. Denies Rash.

Neurologic:

Denies Headache. Denies Tingling/Numbness. Denies Tremor.

Vital Signs

Temp 97.3 F, HR 80 /min, BP 118/76 mm Hg, Wt 225 lbs, Ht 70 in, BMI 32.28 Index, Oxygen sat % 97 %, ESS 0, Stop Bang Score 3, Quality of Life Scale 6, Ht-cm 177.80, Wt-kg 102.06.

Assessments

1. Snoring - R06.83
2. Obesity (BMI 30-39.9) - E66.9
3. OSA (obstructive sleep apnea) - G47.33

Treatment

1. OSA (obstructive sleep apnea)

Notes:

the patient was instructed to get new supplies periodically

- the patient needs to loose weight

Continue APAP at the current pressure, no need to make any changes, I will send a prescription for supplies.

2. Others

Clinical Notes:

Download information were discussed with the patient, he is on out of AutoPap with a minimum pressure of 6.6, maximum pressure of 12, the apnea-hypopnea index is 0, compliance is excellent at 97%, the patient is compliant and benefiting from the treatment

The patient informed me that the humidifier on his machine is not working but is not complaining of dry mouth he might be eligible for a new machine but the patient elected to wait a little bit hoping to have a new model on the market soon, he is comfortable with the machine and the pressure, the humidity is not working but not bothering the patient and he has not used his the humidity for a while so I will keep him on the same machine but I advised him if at any point he wants a new machine to call us otherwise he will follow up with me in 1 year..

Visit Codes
